

COMPASS AI

Investment-Grade Network Design. With Speed & Precision.

COMPASS AI accelerates digital infrastructure planning through geospatial intelligence and AI—delivered as an expert-led service, not a tool.

Built for broadband providers, advisors, engineering firms, and investors, COMPASS AI enables faster, smarter decisions on where and how to build—helping clients win funding, support acquisitions, and design hybrid networks at scale.

Why COMPASS AI?

Expert-Led or DIY

Skip the platform learning curve. We deliver ready-to-use network designs, so you can focus on execution—not configuration.

Investment-Grade Output

Trusted by private equity, engineering firms, and operators to support over \$1B in BEAD bids.

Hybrid Network Intelligence

Model both fiber and fixed wireless access (FWA) in one unified strategy. Get optimal coverage, faster.

Future-Ready Design

Plan now with expert guidance. Transition to platform-based access in 2026 for long-term scalability.

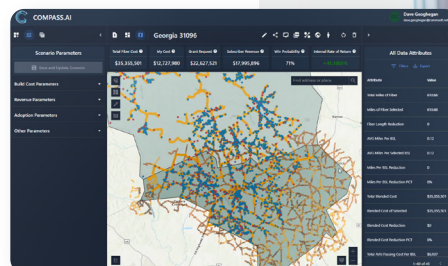

Speed to Insight

Bid-ready models for 250+ project areas in days—not weeks.

Delivered As-A-Service

- ✓ Feasibility Assessments
- ✓ Hybrid Fiber + FWA Network Design
- ✓ BEAD and Bond-Funded Bid Modeling
- ✓ Multi-State Rollout & Acquisition Support
- ✓ Disaster Recovery & Resiliency Planning
- ✓ Real-time Income Statement

Built For

Private Equity & Investors

- Evaluate targets and model ROI
- Scale insights across multi-state portfolios

ISPs & Operators

- Prioritize expansion zones with confidence
- Align engineering and finance on a unified plan

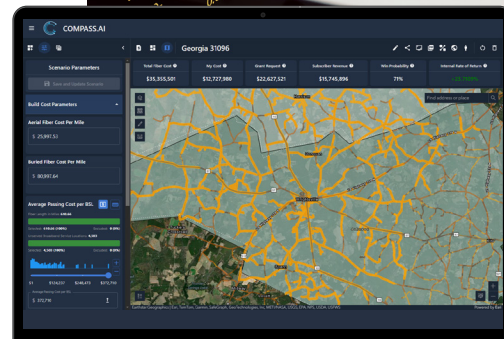

Engineering Firms & Consultants

- Extend delivery capacity with white-labeled modeling
- Differentiate with rapid, AI-backed outputs

Municipalities & Public Broadband Authorities

- Plan bond- or grant-funded expansion
- Build trust through transparent, strategic designs

Coming Soon: COMPASS AI Platform

A seat-based SaaS platform launches in Q1 2026—offering high-volume users direct access to powerful modeling workflows.

Planning a Bid? Let's Maximize Your Advantage.
